Briefly describe your relevant experience and interests:

I had joined "Apps Industry" talk. All the speakers are CEO of different companies that created success apps like Madcat, MDEC and Taxi Monger. This talk makes me more interest in the app development industry especially android. I will always try my best to make the best outcome for every task that leader assigns to me.

Briefly describe your work on other team projects:

With other team, normally I worked for the documentation part, especially for the compilation and final report. I also work as a programmer for prolog and Java project.

Briefly describe any leadership or management positions you have held (at work or in clubs/ organization):

I had worked as secretary of a computer company in my hometown. This company has become a supplier of hardware and software for many clients. Two of the clients are Hospital Taiping and Silverstone. I in charge of handling document for stock. I also needed to pick up phone calls, send and receive invoices and try to do the best for client and customer satisfaction. I am good in client and customer service as long as I understand clearly what the management wants.

State your team preferences, if any:

I prefer to work with the team that understand each other, not selfish and be a helping hand for each other. Everyone checks other people part so we can make a better outcome. No one left behind and no one looks down on the others.
