Defect Recording Log Instructions

Purpose	Use this form to hold data on the defects you find and correct.
General	- Keep a separate log for each program component. - Record each defect seperately and completely. - If you need additional space, use another copy of the form.
Header	Enter the following: - Enter your name, date, team name, and instructor's name - Name the assembly - Enter the cyclel number
Date	Enter the date you found the defect
Number	- Enter the defect number. - For each program component (or module), use a sequential number starting with 1 (or 001 and so on)
Type	- Enter the defect type from the Defect Types Standard list (also summarized at the top of the Defect Recording Log). - Use your judgment in selecting which type applies.
Inject	- Enter the phase during which the defect was injected. - Use your judgment.
Remove	- Enter the phase during which the defect was fixed. - This is generally the phase during which you found the defect.
Fix time	- Enter the time you took to fix the defect. - This time can be determined by stopwatch or by judgment.
Fix defect	- If you or someone else injected this defect while fixing another defect, record the number of the improperly fixed defect. - If you cannot identify the defect number, enter an X in the Fix Defect box.
Description	- Write a succinct description of the defect that is clear enough to later remind you about the error that caused the defect and why you made it. - If the defect was injected in a prior cycle, give the cycle number and put an * by the phase injected (such as code* or design*).
